Feed Ingredients

Cremer FEED has been supplying the entire compound feed industry, as well as Deutsche Tiernahrung Cremer, with standardized and individually mixed feed fat blends. Due to their individual composition of fatty acids, the purely vegetable-based raw material components are an essential source of energy for farm animals.

To ensure the highest quality standard, we draw on our global network of branches, who carefully analyze the raw materials already in the country of origin and enable full traceability.

Vegetable Feed Fats

Vegetable Feed Fats for the ideal supply of energy.

Monopropylene Glycol / Glycerin Blends
- Metabolism booster for dairy cattle
- High acceptance
- Ketose prophylaxis

Acid Oils
- Olive Acid Oil
- Mixed Vegetable Acid Oil
- Sunflower Acid Oil
- Rapeseed Acid Oil

Oyster Grit mix
- Ca-supply for laying hen and poultry, different grain size

Palm Fatty Acid Distillate
- FFA >= 70 %
- Saponifiable matters >= 95 %
- Moisture and impurities <= 1 %

Rumen stable fat
- Fractionated palm fatty acid
- C16 (Palmitic acid) min. 80 % / 90 % / 98 % / 99,5 %
- Calcium Soaps

Qualities
- GMP+ / QS / NGMO / RSPO

Packaging
- Bulk, IBC, Drums, 25 kg bags, Big Bags
