

MECHATRONICS TECHNICIAN

Mechatronics technicians manufacture mechanical, electrical and electronic components and assemble these into complex systems and plants. They commission the finished systems, program them and install the relevant software. The specialists work according to wiring diagrams and construction drawings and carefully inspect systems, before handing them over to customers. Repair and maintenance, as well as retrofitting machines also fall under their responsibility.

Training location:

Deutsche Tiernahrung Cremer GmbH & Co. KG, bundesweit

Deutsche Tiernahrung Cremer GmbH & Co. KG
