

BACHELOR OF ENGINEERING

This practical Bachelor's programme is offered in cooperation with Lübeck University of Applied Sciences with the aim of training young talent in the food industry. The integrated degree programme runs over 4.5 years, culminating in a "Bachelor of Engineering". Parallel to the studies at Lübeck University of Applied Sciences, vocational training in food technology takes place at Nordgetreide This is done in cooperation with the Neumünster vocational school. After successful completion of the degree course, graduates can work in a large variety of fields in food production, food production organisation and control, production controlling, process development, as well as production management.
